

Plastic recycling systems

Crosswire Extractor CWE-1200

Our unique solution for dewiring of crosswise wired mixed plastic bales

Capacity 80 bales/h (up to 120 to/h) Bale weight max. 1500 kg

Dewiring efficiency min. 90 %

Plant availability min. 99 %

Innovation meets responsibility

FMW creates highly efficient sustainable solutions for plastic recycling systems

True to our slogan Engineers of progress, we engineer handling machines, which embody innovative design, thought through to the smallest detail, uncompromising quality and superior performance in continuous operation.

Together with our partners and clients we constantly push the progress of the recycling industry in terms of efficiency and sustainability. The latest proof for that is our Crosswire Extractor CWE-1200.

Additionally FMW offers solutions for bale breaking and any kind of conveyor technology.
